To Whom It May Concern:

I have collaborated with Wynn-Smith Landscape Architecture, Inc. for many years designing custom residential projects. I have always found the firm to be a positive addition to the design team.

The design partner, Tim Smith, is a very creative and resourceful individual. His contributions to the design process always improve the total design. Tim is a consummate “team player,” contributing to the design in a totally professional manor, respecting all the other design professionals’ ideas and concepts while contributing his unique perspective.

Being a team player means carefully listening to and understanding the client’s needs and desires. Tim takes great pride in meeting these needs with new and exciting designs. His designs go far beyond the usual aesthetic considerations. Tim is deeply committed to establishing a landscape that is sustainable and friendly to the environment. Water conservation and indigenous plant selections are among his many design strengths. The idea of green design is something he has been practicing for years, long before the term became a fashionable buzzword.

Creating an innovative and appropriate design is only the start of the process. Tim is fully involved throughout the construction and planting phases of the project. This means visiting the job site while the actual installation occurs to ensure that the design concepts are being followed and that the planting and irrigation systems will look and function as they should.

My experience working with Wynn-Smith Landscape Architecture, Inc. has been exceptionally rewarding. If every design professional were as creative, thorough and dependable as he is my job would be far easier. I highly recommend Tim Smith to anyone wishing to retain landscape architectural services.

Respectfully,
Carl L. Strona, FAIA
